

BASKET PRESSES

CEP

Vertical electric-hydraulic basket press mounted on wheels. Electrical motor and control panel mounted on press.

Models:

Sirio – Traditional model with zinc-plated trolley and wooden basket with coated iron bands.

Sirio C – Zinc-plated trolley and wood basket with stainless steel bands.

Sirio X – Zinc-plated trolley and basket made entirely of stainless steel (Models 70 & 80).

Options include:

- Extra trolley and basket.
- Pressing plate and trolley centering plates coated in stainless steel.
- Double hydraulic pumps.
- Nylon drainage disks and fabric filter bags.

MODEL	BASKET CAPACITY	BASKET SIZE	LENGTH X WIDTH X HEIGHT
Sirio 60	60 Gal	2' x 2' 6"	4' x 2' 9" x 7'
Sirio 70	81 Gal	2' 4" x 2' 6"	5' 2" x 3' 9" x 7' 7"
Sirio 80	126 Gal	2' 8" x 3' 2"	5' 9" x 4' 1" x 8' 5"
Sirio 100	238 Gal	3' 4" x 3' 7"	6' 11" x 4' 5" x 9' 6"

BASKET PRESSES

Milani

Vertical automated hydraulic basket press.

- Large hydraulic ram creates an even pressure on the pressing plate that will allow the liquid to filter through the grape pulp and prevents the liquid from splashing outwards.
- Slotted stainless steel basket is protected on the outside with a transparent, movable, accident prevention cylinder.
- Cage and safety cylinder are lifted simultaneously by two hydraulic rams to remove the grape pulp.
- Pressing phases are controlled with a PLC containing 10 programs to control and optimize each and every phase of the processing cycle.

MODEL	BASKET CAPACITY	LENGTH X WIDTH X HEIGHT
Hercules 10	211 Gal	6' 7" x 4' 3" x 11' 6"
Hercules 15	475 Gal	8' 2" x 5' 11" x 11' 6"
